

COMBINED HEAT & POWER

Technical Assistance Program for Small Scale Systems & Public Entities

DIRECT Technical Assistance Activities:

To support particular projects who have requested help from us or have otherwise come to our attention. This can be at various stages in a project's life and we propose providing direct support in all of them, depending on available resources. The four main areas include:

1. **Conceptual design:** Help in the early stages of the project, provide simple analysis & information customized for a client.
2. **Initial Feasibility Estimate:** On-site evaluation of potential project designs, project costs & payback estimates, provide site sufficient confidence to go forward.
3. **CHP Program Information Dissemination:** Promote the program in general & help potential proposes to insure complete & accurate proposals.

4. **Informational commissioning/case study development:** Track & evaluate the performance achieved by various CHP projects (BPU funded or un-funded) in the state, formal contractual commissioning & development of case studies.

THE BUSCH COGENERATION PLANT (CAPACITY 14 MW), RUTGERS UNIVERSITY

THE STATE UNIVERSITY OF NEW JERSEY
RUTGERS

INDIRECT Technical Assistance Activities:

1. **Informational Resources:** Establishing & maintaining a web page for potential CHP adopters. Go to <http://mae.rutgers.edu/chp> for more details.
2. **Educational Activities:** Arrange academic technical training programs to provide instruction for different levels of expertise in the field.
